**ROIC is calculated as EBITDA/Invested Capital

After a decline in economic activity in the second and third quarters of the year derived from the COVID-19 pandemic, the fourth quarter of the year showed a significant recovery as economic activities have reopened and growth plans are beginning to reactivate, we expect the demand for cement and concrete to be more dynamic in line with this economic reactivation, which will strengthen the company's operating results.

Based on these expectations, we raise our target price at the end of 2021 to P \$ 68.70 and we maintain our Buy recommendation.
